When: Thursday September 23, 2021, 7:00pm–9:00pm

Where:  Attend In-Person : Camp Hill Borough Hall
2145 Walnut St, Camp Hill, PA 17011

 Attend Virtually : Through Microsoft Teams -
tinyurl.com/GreenwayMeeting1

The Conodoguinet Creek Greenway Trail Feasibility Study is a public process which will determine the optimal route for a recreational trail (both on and off road) along the Conodoguinet Creek. The Greenway will terminate at the Susquehanna River and connect the communities of East Pennsboro Township, Camp Hill Borough, and Hampden Township. The Greenway is envisioned as a multi-modal transportation resource that can enhance the quality of life for area residents and provide recreational access to the beautiful Conodoguinet Creek.

The feasibility study is being conducted by Simone Collins Landscape Architecture of Norristown, PA. on behalf of the Cumberland Conservation Collaborative.
